

FMTIA10 Fitting Instructions

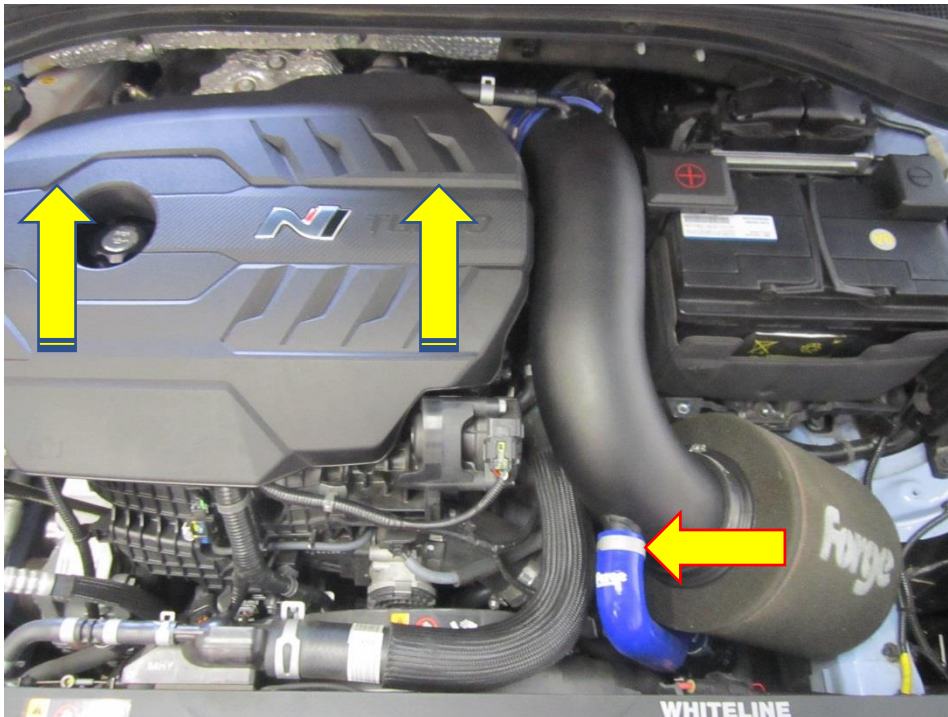

Please thoroughly read through and familiarise yourself with these instructions in their entirety prior to beginning any part of the installation process of any component. Please also ensure the vehicle and engine has cooled down sufficiently to avoid risking possible skin burns or other injury.

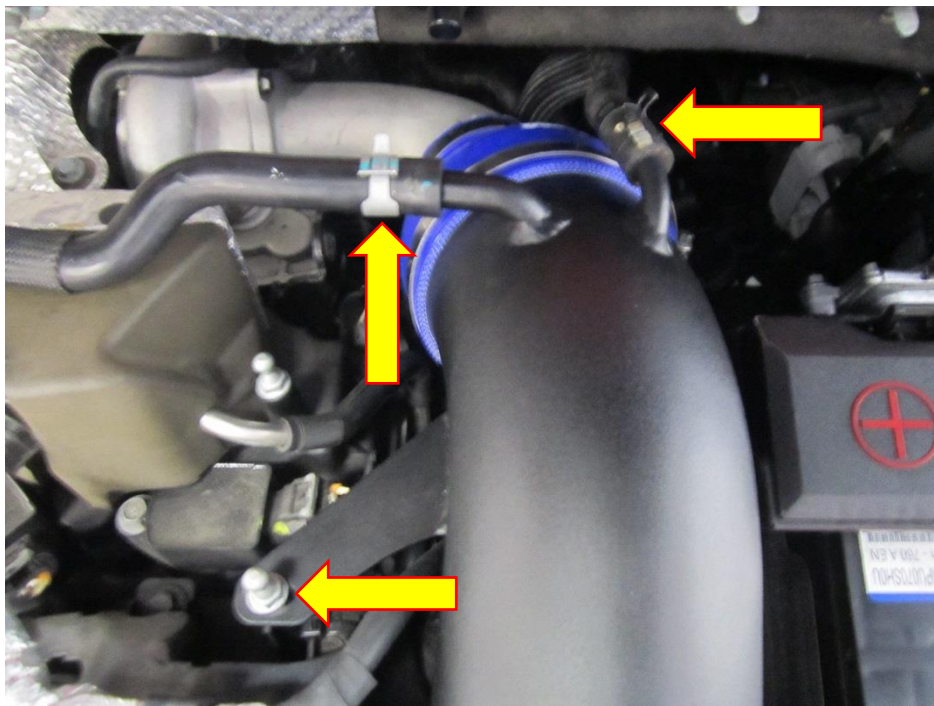

TOOLS NEEDED:

- Hose Clamp removal tool/Long nose pliers
- 10mm spanner
- 7/10mm Socket and Ratchet and suitable extension
- 5mm Allen Key

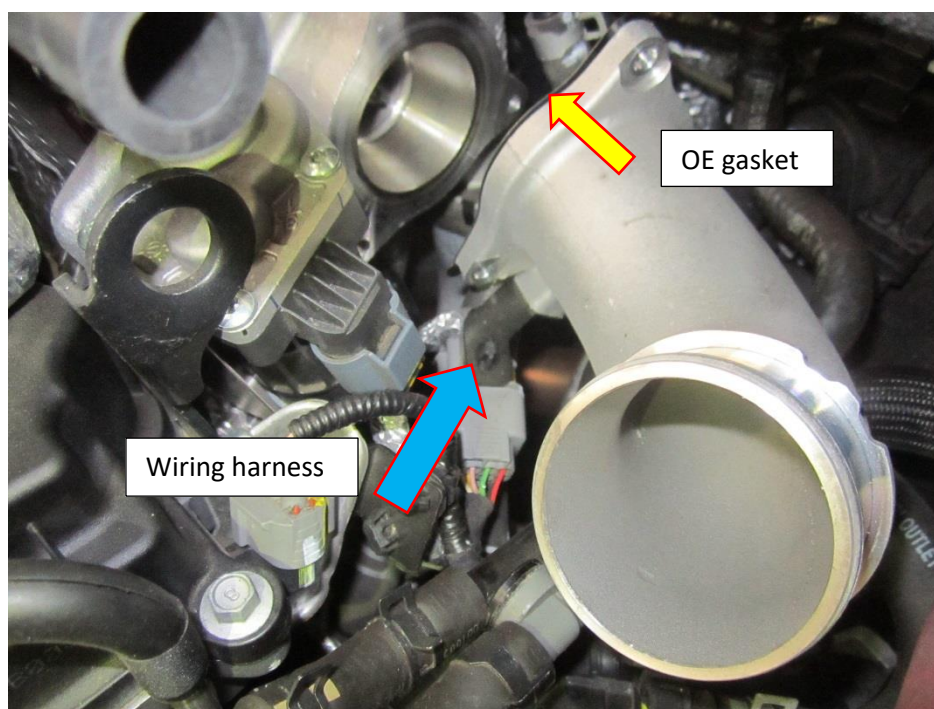

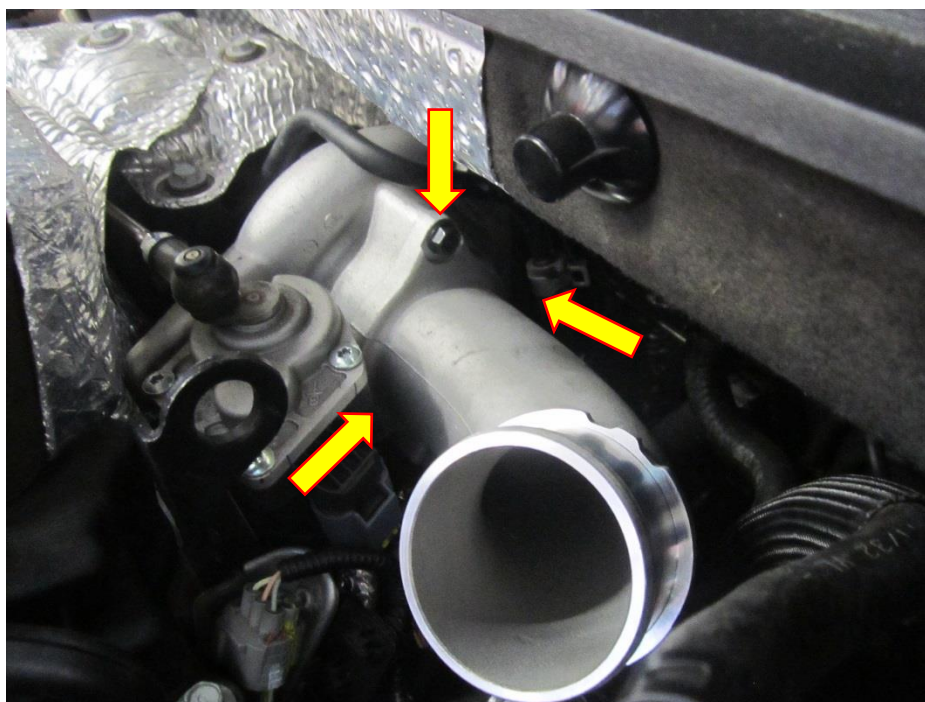

1. Open the bonnet and locate the engine cover, remove it by pulling it upwards. With the use of a hose clamp removal tool or long nose pliers release the hose clamp attaching the DV hose to the intake pipe.

2. Remove the two breather hoses at the top of the intake pipe, like the previous step release the hose clamp to allow the hoses to be removed. Remove the 10mm fastener which secures the boost pipe to the engine. Finally undo the hose clamp attaching the silicone hose to the OE turbo elbow, use a 7mm socket and ratchet to do this. The intake pipe can now be removed from the vehicle.

3. To remove the OE turbo elbow, using a 10mm socket and ratchet with extension remove the three 10mm fasteners attaching the elbow to the turbo, unclip the wiring harness attached to the turbo elbow, the turbo elbow can now be removed from the turbo. Be careful not to lose the OE gasket down the back of the engine bay when removing.

4. Take the Forge Motorsport machined turbo adaptor and offer it up to the OE gasket as shown in the pictures below.

5. Fit the Forge Motorsport machined adaptor to the turbo using the M6x16mm fasteners provided with the use of a 5mm Allen key, make sure the gasket is placed between the turbo and the Forge adaptor.

6. With the machined adaptor fitted to the turbo, you can now fit the Forge silicone inlet hose. Use the 70-90mm hose clamp provided to secure the inlet hose to the adaptor, fit it loosely at this stage to allow for adjustment.

7. Now copy steps 1-2 in reverse order to complete the install. Once finished take the vehicle for a test drive and enjoy the added performance from your new Forge Motorsport product.
